“Overall we have been happy with the Venturo CT310KX Electric Mast Crane. At times when we need to extend it out to load drums on and off the truck we find it works great for our needs.”

Electric Crane Helps Move Resources in Oil & Gas Industry

Background

Baker Hughes is a leading supplier of oilfield services, products, technology and systems to the worldwide oil and natural gas industry. The company's 34,000 employees help customers find, evaluate, drill, produce, transport and process hydrocarbon resources. Baker Hughes delivers solutions that help oil and gas operators make the most of their reservoirs.

Challenge

Baker Hughes needed additional capacity to move resources, including picking up 55-gallon, 500-pound steel or plastic drums from the ground or from the truck. The company already had positive experiences with the Venturo CT310KX Electric Mast Crane mounted on several trucks in their fleet, so when the need arose to add a new truck from JD Trucks in Somerset, PA, they looked to Venturo for the crane.

Solution

The Venturo CT310KX Electric Mast Crane is a four-function electric crane that features a heavy-duty planetary electric winch and a small footprint.

“Overall we have been happy with the Venturo CT310KX Electric Mast Crane,” said Patrick Hubbard, senior driver with Baker Hughes. “At times when we need to extend it out to load drums on

and off the truck we find it works great for our needs.”

Hubbard said he keeps the Venturo CT310KX greased and lubricated and it is easy to maintain. It also keeps staff safe as it beeps to warn of potential overload.
